WORK EXPERIENCE

Software Developer   Jan 2024 - Present

10times Pvt. Ltd. | Bangalore, India

- Developed web applications using HTML, CSS, JavaScript and TypeScript to create responsive and user-friendly interfaces.
- Implemented front-end functionalities using React.js, including reusable component creation, state management, and event handling.
- Integrated RESTful APIs to fetch and update data, enhancing the application's functionality and user experience.
- Utilized Tailwind CSS and Sass to streamline the styling process and maintain consistency across projects.
- Contributed to live projects, collaborating with cross-functional teams to solve real-world problems and deliver quality solutions.
- Demonstrated proficiency in Next.js, leveraging its features to build efficient and scalable web applications.
- Employed React hooks for state management, improving code readability and facilitating easier debugging.
- Managed project tasks and workflows efficiently using Jira, ensuring clear communication and timely delivery of milestones.

Software Engineer   Feb 2023 - Dec 2023

Webkul Software Pvt. Ltd. | Noida, India

- Acquired foundational skills in web development through hands-on experience with HTML, CSS and JavaScript, React.js and RestAPIs.
- Applied learned concepts to contribute effectively to live projects, addressing real-world problems and delivering high-quality solutions.
- Embraced learning opportunities to master Next.js, showcasing a dedication to continuous skill enhancement and readiness to explore advanced frameworks.

PROJECTS

Eventeli - *Next.js | TypeScript | D3.js*

- Developed an advanced event intelligence platform that empowers businesses to optimize operations by providing real-time insights, trend analysis, and predictive analytics on upcoming events.
- Engineered a predictive analytics tool that forecasts the likelihood of event recurrence, allowing businesses to anticipate future opportunities and strategically prepare their operations to capitalize on event-driven customer demand.

Recofy - *Next.js | TypeScript | RestfulAPIs*

- Developed and implemented a dynamic recommendation system within the event-based platform.
- Personalized business recommendations drove increased user interaction with the platform, resulting in longer user sessions and higher retention rates.

E-Commerce Minimalist - *React.js | Tailwind CSS*

- This website features a modern and intuitive design, with easy-to-use navigation and a simple shopping experience that puts the focus on the products.
- Ensured that the website is fully responsive and optimized for mobile devices, providing a consistent experience across all screen sizes and devices.
